BRAND STORY

It is hard to believe that we have been around for the best part of 70 years. For decades, as the leader in Taiwan for health protection supplies, we have supplied reliable and quality medical supplies to doctors and hospitals internationally, and we have become a significant player in the process. Though you may not be all too familiar with the extent of what the CSD brand does, it is extremely likely that you have been in contact with our products at some point in your life.

With profound changes in homecare needs over the last decade, brought about by the likes of SARS, an aging population and changes in the environment's air quality, we are taking our expertise and applying it to CSD's vision for the consumer homecare market. Designed to not only deliver high levels of safety and performance, but to also bring style and character, and be desirable in the same process, CSD is combining health and style to everyday homecare products. For decades to come, from hospitals to the street, CSD will continue to redefine standards and set new trends.
